Subject Index

Acute respiratory distress syndrome
diffuse large B-cell lymphoma manifesting as, 328(6):354–356
lung in sepsis, 328(4):230–237
Addison disease, patient with concurrent primary hyperaldosteronism and adrenal insufficiency, 328(6):344–347
Adherence to treatment
in HIV infection
antiretroviral-experienced patient, 328(1):10–16
antiretroviral therapy in drug-naive patients, 328(1):3–9
literacy and numeracy skills and anticoagulation control, 328(2):88–93
Adrenal insufficiency
endocrine system in sepsis, 328(4):238–247
patient with concurrent primary hyperaldosteronism and, 328(6):344–347
primary hypothalamic lymphoma with panhypopituitarism presenting as stiff-man syndrome, 328(2):124–128
Alcohol septal ablation, for hypertrophic cardiomyopathy: monomorphic ventricular tachycardia as late complication of, 328(3):185–188
Aldosterone
patient with concurrent primary hyperaldosteronism and adrenal insufficiency, 328(6):344–347
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Anal dysplasia, human papillomavirus infection in HIV-infected persons, 328(1):57–63
Anticoagulation control, literacy and numeracy skills and, 328(2):88–93
Antimicrobial therapy, impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
Antiretroviral therapy
antiretroviral-experienced patient, 328(1):10–16
in drug-naive patients with HIV infection, 328(1):3–9
for HIV with hepatitis B or hepatitis C coinfection, 328(1):26–36
impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314
introduction to symposium on management of HIV and AIDS, 328(1):1–2
metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56
role in end-of-life care, 328(1):37–47
Aortic regurgitation, quadricuspid aortic valve, 328(5):281–285
Arrhythmias
monomorphic ventricular tachycardia: late complication of percutaneous alcohol septal ablation for hypertrophic cardiomyopathy, 328(3):185–188
pulmonary vein ablation of atrial fibrillation: beyond the traditional, 328(6):323–329
Arthropathy, HIV-associated Jacoud arthropathy, 328(6):351–353
Atrial fibrillation, pulmonary vein ablation: beyond the traditional, 328(6):323–329
Autoimmune disease, antineutrophil cytoplasmic autoantibody-associated rapidly progressive glomerulonephritis in a patient with primary biliary cirrhosis, 328(3):176–179

Bacteremia, risk factors for recurrent bacteremia in adult patients with nontyphoid salmonellosis, 328(6):315–318
Beta-blockers, use in older adults with chronic heart failure, 328(2):100–111
Bland-White-Garland syndrome, anomalous origin of coronary arteries from pulmonary trunk in two separate patients with a review of the clinical implications and current treatment recommendations, 328(2):112–115
Blood pressure
disturbances in renal autoregulation and susceptibility to hypertension-induced chronic kidney disease, 328(6):330–343
normal exercise blood pressure response in African-American women with parental history of hypertension, 328(2):78–83
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Bone disease, metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56

Cardiovascular health and disease
anomalous origin of coronary arteries from pulmonary trunk in two separate patients with a review of the clinical implications and current treatment recommendations, 328(2):112–115
comparison of HIV-positive patients with and without infective endocarditis: an echocardiographic study—The Emory Endocarditis Group experience, 328(3):145–149
elevated serum cardiac troponin I level in a patient after a grand mal seizure and with no evidence of cardiac disease, 328(3):189–191
impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
interatrial right-to-left shunt after lung surgery: diagnostic value of perfusion lung scanning, 328(3):180–184
laboratory, reading center, and coordinating center data management methods in the Jackson Heart Study, 328(3):131–144
monomorphic ventricular tachycardia: late complication of percutaneous alcohol septal ablation for hypertrophic cardiomyopathy, 328(3):185–188
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
pulmonary vein ablation of atrial fibrillation: beyond the traditional, 328(6):323–329
quadricuspid aortic valve, 328(5):281–285
recurrence of cervical carcinoma manifesting as cardiac metastasis three years after curative resection, 328(3):167–169
37-year-old man with fever and dizziness, 328(3):162–166
use of beta-blockers in older adults with chronic heart failure, 328(2):100–111
Case Records of the VA Maryland Health Care System/University of Maryland Medicine, 37-year-old man with fever and dizziness, 328(3):162–166
Cervical carcinoma, recurrence manifesting as cardiac metastasis three years after curative resection, 328(3):167–169
Cervical dysplasia
human papillomavirus infection in HIV-infected persons, 328(1):57–63
management of HIV infection in women, 328(1):17–25
Cholestasis, severe cholestatic jaundice in hyperthyroidism after treatment with 131-iodine, 328(6):348–350
Clinical laboratory techniques, laboratory, reading center, and coordinating center data management meth-

ods in the Jackson Heart Study, 328(3):131–144
Clinical trials
comparison of bedtime insulin glargine with bedtime neutral protamine Hagedorn insulin in patients with type 2 diabetes, 328(5):274–280
presence of hypotheses in medical literature, 328(6):319–322
Clotting factors, coagulation in sepsis, 328(4):196–204
Coagulopathy
drotrecogin alfa (activated) for treatment of severe sepsis and septic shock, 328(4):205–214
lung in sepsis, 328(4):230–237
in sepsis, 328(4):196–204
Coccidioidomycosis, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Computed tomography, sarcoidosis manifesting as massive splenomegaly, 328(3):170–172
Computerization, the progressive roles of electronic medicine: benefits, concerns, and costs, 328(2):94–99
Contraception, management of HIV infection in women, 328(1):17–25
Coronary arteries, anomalous origin of coronary arteries from pulmonary trunk in two separate patients with a review of the clinical implications and current treatment recommendations, 328(2):112–115
Corticosteroids, endocrine system in sepsis, 328(4):238–247
Cryptococcosis, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Cytokines
dysregulation of immune response in severe sepsis, 328(4):220–229
lung in sepsis, 328(4):230–237
Cytomegalovirus, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69

Data management, laboratory, reading center, and coordinating center data management methods in the Jackson Heart Study, 328(3):131–144
Diabetes insipidus, primary hypothalamic lymphoma with panhypopituitarism presenting as stiff-man syndrome, 328(2):124–128
Diabetes mellitus, comparison of bedtime insulin glargine with bedtime neutral protamine Hagedorn insulin in patients with type 2 diabetes, 328(5):274–280
Diagnosis
elevated serum cardiac troponin I level in a patient after a grand mal seizure and with no evidence of cardiac disease, 328(3):189–191
interatrial right-to-left shunt after lung surgery: diagnostic value of perfusion lung scanning, 328(3):180–184
leptospirosis misdiagnosed as pulmonary-renal syndrome, 328(2):116–120
1,25-Dihydroxyvitamin D, hypercalcemia secondary to leprosy, 328(6):357–359
Disseminated intravascular coagulation, in sepsis, 328(4):196–204
Drotrecogin alfa (activated), for treatment of severe sepsis and septic shock, 328(4):205–214
Drug adverse effects, interferon-alpha-associated sarcoidosis responsive to infliximab therapy, 328(3):173–175
Drug resistance
in HIV infection
antiretroviral-experienced patient, 328(1):10–16
drug-naive patients, 328(1):3–9
impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
Dyslipidemia, metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56

Echocardiography
comparison of HIV-positive patients with and without infective endocarditis: an echocardiographic study—The Emory Endocarditis Group experience, 328(3):145–149
interatrial right-to-left shunt after lung surgery: diagnostic value of perfusion lung scanning, 328(3):180–184
monomorphic ventricular tachycardia: late complication of percutaneous alcohol septal ablation for hypertrophic cardiomyopathy, 328(3):185–188
quadricuspid aortic valve, 328(5):281–285
recurrence of cervical carcinoma manifesting as cardiac metastasis three years after curative resection, 328(3):167–169
Electrocardiography
elevated serum cardiac troponin I level in a patient after a grand mal seizure and with no evidence of cardiac disease, 328(3):189–191
monomorphic ventricular tachycardia: late complication of percutaneous alcohol septal ablation for hypertrophic cardiomyopathy, 328(3):185–188
Electronic medicine, the progressive roles of electronic medicine: benefits, concerns, and costs, 328(2):94–99
End-of-life treatment, palliative care for HIV infection, 328(1):37–47
Endocarditis
comparison of HIV-positive patients with and without infective endocarditis: an echocardiographic study—The Emory Endocarditis Group experience, 328(3):145–149
impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
quadricuspid aortic valve, 328(5):281–285
Endocrine system
hypercalcemia secondary to leprosy, 328(6):357–359
patient with concurrent primary hyperaldosteronism and adrenal insufficiency, 328(6):344–347
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
in sepsis, 328(4):238–247
thyrotoxicosis presenting as hypogonadism: case of central hyperthyroidism, 328(5):295–298
Epidemiology
laboratory, reading center, and coordinating center data management methods in the Jackson Heart Study, 328(3):131–144
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Errata, 129
Euthyroid sick syndrome, endocrine system in sepsis, 328(4):238–247
Exercise
fatal exertional heat stroke: a case series, 328(2):84–87
normal exercise blood pressure response in African-American women with parental history of hypertension, 328(2):78–83
Extramedullary hematopoiesis, intrathoracic masses due to, 328(5):299–303

Genetics, polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Geriatric patients, use of beta-blockers in older adults with chronic heart failure, 328(2):100–111
Global health, should we establish a North American school of global health sciences?, 328(2):71–77
Glomerulonephritis, antineutrophil cytoplasmic autoantibody-associated rapidly progressive glomerulonephritis in a patient with primary biliary cirrhosis, 328(3):176–179

Heart failure, use of beta-blockers in older adults with chronic heart failure, 328(2):100–111
Heat illness, fatal exertional heat stroke: a case series, 328(2):84–87
Heat shock proteins, dysregulation of immune response in severe sepsis, 328(4):220–229
Hematopoiesis, extramedullary, intrathoracic masses due to, 328(5):299–303

Hepatitis B or hepatitis C, coinfection with HIV, 328(1):26–36
Histopathology
antineutrophil cytoplasmic autoantibody-associated rapidly progressive glomerulonephritis in a patient with primary biliary cirrhosis, 328(3):176–179
metastatic pure small-cell carcinoma of prostate, 328(5):286–289
sarcoidosis manifesting as massive splenomegaly, 328(3):170–172
Histoplasmosis, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Human immunodeficiency virus (HIV) infection
antiretroviral-experienced patient, 328(1):10–16
antiretroviral therapy in drug-naive patients with, 328(1):3–9
coinfection with hepatitis B or hepatitis C, 328(1):26–36
comparison of HIV-positive patients with and without infective endocarditis: an echocardiographic study—The Emory Endocarditis Group experience, 328(3):145–149
human papillomavirus infection and, 328(1):57–63
impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314
integration of palliative care into primary care, 328(1):37–47
introduction to symposium on management of HIV and AIDS, 328(1):1–2
Jacoud arthropathy associated with, 328(6):351–353
management in women, 328(1):17–25
metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56
prophylaxis against opportunistic infections in, 328(1):64–69
Human papillomavirus infection, in HIV-infected persons, 328(1):57–63
Hypercalcemia, secondary to leprosy, 328(6):357–359
Hyperglycemia, endocrine system in sepsis, 328(4):238–247
Hypertension
disturbances in renal autoregulation and susceptibility to hypertension-induced chronic kidney disease, 328(6):330–343
normal exercise blood pressure response in African-American women with parental history of hypertension, 328(2):78–83
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Hyperthyroidism
severe cholestatic jaundice in hyperthyroidism after treatment with 131-iodine, 328(6):348–350
thyrotoxicosis presenting as hypogonadism, 328(5):295–298
Hypertriglyceridemia, plasmapheresis as adjuvant therapy for pancreatitis induced by, 328(5):290–294
Hypoglycemia, comparison of bedtime insulin glargine with bedtime neutral protamine Hagedorn insulin in patients with type 2 diabetes, 328(5):274–280
Hypogonadism, thyrotoxicosis presenting as, 328(5):295–298
Hypokalemia, patient with concurrent primary hyperaldosteronism and adrenal insufficiency, 328(6):344–347
Hypotheses, in medical literature, 328(6):319–322

Immune response
dysregulation in severe sepsis, 328(4):220–229
lung in sepsis, 328(4):230–237
Immunosuppressive therapy, kidney transplantation: the evolving challenges, 328(3):156–161
Infectious disease
coagulation in sepsis, 328(4):196–204
comparison of HIV-positive patients with and without infective endocarditis: an echocardiographic study—The Emory Endocarditis Group experience, 328(3):145–149
drotrecogin alfa (activated) for treatment of severe sepsis and septic shock, 328(4):205–214
endocrine system in sepsis, 328(4):238–247
human papillomavirus infection in HIV-infected persons, 328(1):57–63
hypercalcemia secondary to leprosy, 328(6):357–359
impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
leptospirosis misdiagnosed as pulmonary-renal syndrome, 328(2):116–120
lung in sepsis, 328(4):230–237
management of HIV infection in women, 328(1):17–25
palliative care for HIV infection, 328(1):37–47
prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
pyelonephritis and acute renal failure, 328(2):121–123
recombinant human activated protein C in sepsis: assessing clinical use, 328(4):215–219
risk factors for recurrent bacteremia in adult patients with nontyphoid salmonellosis, 328(6):315–318
severe sepsis: new concepts in pathogenesis and management, 328(4):193–195
should we establish a North American school of global health sciences?, 328(2):71–77
37-year-old man with fever and dizziness, 328(3):162–166
Inflammation
coagulation in sepsis, 328(4):196–204
drotrecogin alfa (activated) for treatment of severe sepsis and septic shock, 328(4):205–214
dysregulation of immune response in severe sepsis, 328(4):220–229
lung in sepsis, 328(4):230–237
severe sepsis: new concepts in pathogenesis and management, 328(4):193–195
Infliximab, interferon-alpha-associated sarcoidosis responsive to, 328(3):173–175
Influenza, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Insulin
comparison of bedtime insulin glargine with bedtime neutral protamine Hagedorn insulin in patients with type 2 diabetes, 328(5):274–280
endocrine system in sepsis, 328(4):238–247
Insulin resistance, metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56
Interferon
hepatitis B or hepatitis C coinfection with HIV, 328(1):26–36
interferon-alpha-associated sarcoidosis responsive to infliximab therapy, 328(3):173–175
Internet, the progressive roles of electronic medicine: benefits, concerns, and costs, 328(2):94–99

Jacoud arthropathy, HIV-associated, 328(6):351–353
Jaundice, severe cholestatic jaundice in hyperthyroidism after treatment with 131-iodine, 328(6):348–350

Lactic acidosis, metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56
Leprosy, hypercalcemia secondary to, 328(6):357–359
Leptospirosis, misdiagnosed as pulmonary-renal syndrome, 328(2):116–120
Lipodystrophy, metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56
Literacy and numeracy skills, anticoagulation control and, 328(2):88–93
Liver disease
antineutrophil cytoplasmic autoantibody-associated rapidly progressive glomerulonephritis in a patient with primary biliary cirrhosis, 328(3):176–179
hepatitis B or hepatitis C coinfection with HIV, 328(1):26–36
Lung function and disease
diffuse large B-cell lymphoma manifesting as acute respiratory distress syndrome, 328(6):354–356
interatrial right-to-left shunt after lung surgery: diagnostic value of perfusion lung scanning, 328(3):180–184

leptospirosis misdiagnosed as pulmonary-renal syndrome, 328(2):116–120
lung in sepsis, 328(4):230–237
Lyme disease, 37-year-old man with fever and dizziness, 328(3):162–166
Lymphoma
diffuse large B-cell lymphoma manifesting as acute respiratory distress syndrome, 328(6):354–356
primary hypothalamic lymphoma with panhypopituitarism presenting as stiff-man syndrome, 328(2):124–128

Medicaid managed care, impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314
Medical education, should we establish a North American school of global health sciences?, 328(2):71–77
Medical literature, presence of hypotheses in, 328(6):319–322
Medical records, the progressive roles of electronic medicine: benefits, concerns, and costs, 328(2):94–99
Medications
antiretroviral-experienced patient, 328(1):10–16
antiretroviral therapy in drug-naive patients with HIV infection, 328(1):3–9
impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
interferon-alpha-associated sarcoidosis responsive to infliximab therapy, 328(3):173–175
introduction to symposium on management of HIV and AIDS, 328(1):1–2
metabolic complications of highly active antiretroviral therapy in adults, 328(1):48–56
prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
use of beta-blockers in older adults with chronic heart failure, 328(2):100–111
Metastatic disease
metastatic pure small-cell carcinoma of prostate, 328(5):286–289
recurrence of cervical carcinoma manifesting as cardiac metastasis three years after curative resection, 328(3):167–169
Methicillin resistance, impact on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
Mortality, fatal exertional heat stroke: a case series, 328(2):84–87
***Mycobacterium avium* complex,** prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Myogenic reflex, disturbances in renal autoregulation and susceptibility to hypertension-induced chronic kidney disease, 328(6):330–343

Neoplasia
diffuse large B-cell lymphoma manifesting as acute respiratory distress syndrome, 328(6):354–356
metastatic pure small-cell carcinoma of prostate, 328(5):286–289
primary hypothalamic lymphoma with panhypopituitarism presenting as stiff-man syndrome, 328(2):124–128
recurrence of cervical carcinoma manifesting as cardiac metastasis three years after curative resection, 328(3):167–169
Nuclear factor-κB, dysregulation of immune response in severe sepsis, 328(4):220–229

Opportunistic infections in HIV
impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314
prophylaxis against, 328(1):64–69
Outcomes
impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to *Staphylococcus aureus,* 328(3):150–155
impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314

Pain management, palliative care for HIV infection, 328(1):37–47
Pancreatitis, hypertriglyceridemia-induced, plasmapheresis as adjuvant therapy for, 328(5):290–294
Parathyroid hormone, hypercalcemia secondary to leprosy, 328(6):357–359
Patient education, literacy and numeracy skills and anticoagulation control, 328(2):88–93
Pelvic inflammatory disease, management of HIV infection in women, 328(1):17–25
Plasmapheresis, as adjuvant therapy for hypertriglyceridemia-induced pancreatitis, 328(5):290–294
***Pneumocystis carinii* pneumonia,** prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Polymorphisms, in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Pregnancy
management of HIV infection in women, 328(1):17–25
prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Primary biliary cirrhosis, antineutrophil cytoplasmic autoantibody-associated rapidly progressive glomerulonephritis in a patient with, 328(3):176–179
Professional publications, presence of hypotheses in medical literature, 328(6):319–322
Prostate cancer, metastatic pure small-cell carcinoma, 328(5):286–289
Protein C
coagulation in sepsis, 328(4):196–204
drotrecogin alfa (activated) for treatment of severe sepsis and septic shock, 328(4):205–214
recombinant human activated protein C in sepsis: assessing clinical use, 328(4):215–219
Pulmonary-renal syndrome, leptospirosis misdiagnosed as, 328(2):116–120
Pyelonephritis, acute renal failure and, 328(2):121–123

Quality of care, impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314

Race/ethnicity
disturbances in renal autoregulation and susceptibility to hypertension-induced chronic kidney disease, 328(6):330–343
normal exercise blood pressure response in African-American women with parental history of hypertension, 328(2):78–83
polymorphisms in renin-angiotensin-aldosterone system and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273
Radioactive iodine, severe cholestatic jaundice in hyperthyroidism after treatment with 131-iodine, 328(6):348–350
Radiofrequency ablation, pulmonary vein ablation of atrial fibrillation: beyond the traditional, 328(6):323–329
Renal disease
antineutrophil cytoplasmic autoantibody-associated rapidly progressive glomerulonephritis in a patient with primary biliary cirrhosis, 328(3):176–179
disturbances in renal autoregulation and susceptibility to hypertension-induced chronic kidney disease, 328(6):330–343
kidney transplantation: the evolving challenges, 328(3):156–161
leptospirosis misdiagnosed as pulmonary-renal syndrome, 328(2):116–120
pyelonephritis and acute renal failure, 328(2):121–123

Renin-angiotensin-aldosterone system
patient with concurrent primary hyperaldosteronism and adrenal insufficiency, 328(6):344–347
polymorphisms and their contribution to hypertension in African Americans and Latinos in Multiethnic Cohort, 328(5):266–273

Salmonellosis, risk factors for recurrent bacteremia in adult patients with nontyphoid salmonellosis, 328(6):315–318
Sarcoidosis
interferon-alpha-associated sarcoidosis responsive to infliximab therapy, 328(3):173–175
manifesting as massive splenomegaly, 328(3):170–172
Scientific methodology, presence of hypotheses in medical literature, 328(6):319–322
Seizures, elevated serum cardiac troponin I level in a patient after a grand mal seizure and with no evidence of cardiac disease, 328(3):189–191
Sepsis
coagulation in sepsis, 328(4):196–204
drotrecogin alfa (activated) for treatment of severe sepsis and septic shock, 328(4):205–214
dysregulation of immune response in severe sepsis, 328(4):220–229
endocrine system in, 328(4):238–247
lung in, 328(4):230–237
recombinant human activated protein C in sepsis: assessing clinical use, 328(4):215–219
severe sepsis: new concepts in pathogenesis and management, 328(4):193–195
Shock, drotrecogin alfa (activated) for treatment of severe sepsis and septic shock, 328(4):205–214
Sickle cell anemia, intrathoracic masses due to extramedullary hematopoiesis, 328(5):299–303
Southern Society for Clinical Investigation (SSCI)
address of the 2003 President, 328(5):249–250
Board of Directors and officers, 328(5):257–259
constitution, bylaws, and amendments, 328(5):261–265
Founders' Medal 2004 acceptance address, 328(5):254–255
Founders' Medal 2004 presentation to J. Claude Bennett, MD, 328(5):251–253
newly elected members, 328(5):260
past recipients of Founders' Medal, 328(5):253
Southwestern Internal Medicine Conference, disturbances in renal autoregulation and susceptibility to hypertension-induced chronic kidney disease, 328(6):330–343
Splenomegaly, sarcoidosis manifesting as, 328(3):170–172
Staphylococcus aureus, impact of methicillin resistance on clinical features and outcomes of infective endocarditis due to, 328(3):150–155
Stiff-man syndrome, primary hypothalamic lymphoma with panhypopituitarism presenting as, 328(2):124–128
Streptococcus pneumoniae, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Stress response, dysregulation of immune response in severe sepsis, 328(4):220–229
Stroke prevention, literacy and numeracy skills and anticoagulation control, 328(2):88–93
Structured treatment interruption, antiretroviral-experienced patient, 328(1):10–16
Surgery
interatrial right-to-left shunt after lung surgery: diagnostic value of perfusion lung scanning, 328(3):180–184
kidney transplantation: the evolving challenges, 328(3):156–161

Thalassemia, intrathoracic masses due to extramedullary hematopoiesis, 328(5):299–303
Thermoregulation, fatal exertional heat stroke: a case series, 328(2):84–87
Thyroid disorders
severe cholestatic jaundice in hyperthyroidism after treatment with 131-iodine, 328(6):348–350
thyrotoxicosis presenting as hypogonadism: case of central hyperthyroidism, 328(5):295–298
Toxoplasmosis, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Transplantation, kidney: evolving challenges, 328(3):156–161
Troponin I, elevated serum cardiac troponin I level in a patient after a grand mal seizure and with no evidence of cardiac disease, 328(3):189–191
Tuberculosis, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69

Utilization of health care resources, impact of statewide Medicaid managed care system on healthcare utilization and outcomes for people living with HIV, 328(6):305–314

Valvular heart disease, quadricuspid aortic valve, 328(5):281–285
Varicella-zoster virus, prophylaxis against opportunistic infections in HIV infection, 328(1):64–69
Vasculature
anomalous origin of coronary arteries from pulmonary trunk in two separate patients with a review of the clinical implications and current treatment recommendations, 328(2):112–115
pulmonary vein ablation of atrial fibrillation: beyond the traditional, 328(6):323–329
Vasopressin, endocrine system in sepsis, 328(4):238–247
Ventricular tachycardia, monomorphic, late complication of percutaneous alcohol septal ablation for hypertrophic cardiomyopathy, 328(3):185–188

Women, management of HIV infection in, 328(1):17–25
